About Coreon GmbH

Coreon Multilingual Knowledge System

Fusion of Terminology Management with Knowledge Graph Modelling

to Enable Multilingual AI

- Founded 2012
- Headquarter: Berlin, Germany
- Management owned

Merging Terminology and Knowledge

Coreon: Multilingual Knowledge System

Like no other thesaurus, taxonomy or terminology tool – Coreon turned out to be the **only comprehensive solution** to implement a multilingual knowledge system.

Lukas Auer, Liebherr MCCtec, Rostock

- space exploration

- A fusion of terminology management with knowledge graphs
- Unlike simple lists or translationonly focused term tools and unlike monolingual, nerdy ontology editors ...
- ... most systematic and visual way to control and share large multilingual knowledge graphs
- Repositories scale from
 - ~100 to ~200,000+ concepts
 - monolingual and up to 50+ languages
- Configurable meta data to the needs of customer domains
- Operated as a SaaS solution

Agenda: Merging Terminology and Knowledge

About Eurovoc

- Managed, curated and shared by the Publications Office of the European Union
- Multilingual, multidisciplinary thesaurus covering the activities of the EU
- ~ 7500 concepts

Eurovoc – Samples

IATE – a Sample

https://iate.europa.eu/entry/result/3542165/en

Eurovoc + IATE: Complementary Resources

- Used for indexing, a meta data "vocabulary" for EU publications and texts
- Hierarchical "top level" taxonomy

= a knowledge graph

- For translation and any variant of multilingual text work
- A large, very detailed language resource that (probably?) covers more or less all things ever dealt with by EU

= a terminology database

What do they contain?

Knowledge Graphs (such as Eurovoc)

- 1) Store concepts and their *labels*
- 2) Relate concepts to each other in a hierarchical or associative manner

Terminology Resources (such as IATE)

- 1) Store concepts and their *terms*
- 2) Store a lot of descriptive and prescriptive information about the concepts and the terms: Definitions, Notes, Usage Guidance ...

Idea: Hook all IATE Concepts within the Eurovoc Knowledge Graph

Idea: Hook all IATE Concepts within the Eurovoc Knowledge Graph

One unified, large, linguistically rich knowledge graph

Merging Terminology and Knowledge

Is there already a link between IATE and Eurovoc? Coreon

How? Use the "Domain" code as anchor

EuroVoc

How? Use the "Domain" / "subjectField" as the technical link

Merging Terminology and Knowledge

Agenda: Merging Terminology and Knowledge

Eurovoc + IATE in One

Reading the Details of a IATE Concept while Browsing the Knowledge Graph

Related IATE Concepts now "close" to each other

- Visually and technically close, such as ...
- "... all IATE concepts that deal with 'product life' "
- ... and more general with 'product quality'

Related IATE Concepts now "close" to each other

 ... and even with 'product safety'

(since all in the branch of 'consumer protection')

Search for "vote": <u>understand i</u>n which branch the hits from IATE reside

Filter, Search, Export – Re-use by Branches

- "Get me all concepts under 'consumer'"
- "Export all En, Fr, It terms that are in the branch of 'consumer behaviour' "
- "Get me translations for terms in branches
 <x> and <y> but not
 <z> ..."

Last but not least: In any EU Language

The knowledge graph

 as is Eurovoc – is
 based on relations
 between concepts,
 thus it is "language
 agnostic"

 Once deployed it can be used for any EU language

Eurovoc + IATE: Observations

Many Eurovoc nodes are not used at all by IATE

Whereas many IATE concepts are just tagged with often generic Eurovoc nodes

IATE concepts hooked in Eurovoc may immediately benefit from Eurovoc's associative relations

Why a Knowledge Graph for Terminologists and Linguists

- StS Coreon
- & Effective way to add structure to terminology collections
- & Improve data quality
 - & avoid duplicates and overlapping concepts
 - & associative relations
- & Easier data maintenance: similar "things" are close to each other
- & Formalize multilingual knowledge, make it machine-digestible
- Boost performance of AI algorithms, priming them with structured data

Agenda: Merging Terminology and Knowledge

Agenda: Merging Terminology and Knowledge

Key Messages: Merging Terminology with Knowledge

- Benefits for data maintainers and consumers
- Eurovoc adds semantics to IATE, IATE is like a "linguistic amplifier" for Eurovoc
- Linguistically rich knowledge graphs enable M-RAG, multilingual indexing, interoperability, cross-language search ...

Thanks a lot!
