

How transparency enables competitive and efficient tendering

A case for even more transparency

Ben Praet

Tender Experts (Belgium)

Tender Experts

- Benelux public tender information provider

- > 2000 paying users
- Proud data partner of:

Stichting Overheidsopdrachten Fondation Marchés Publics

→ Co-created <u>Tender Barometer</u>

PUBLIC PROCUREMENT DATA SUPERPOWERS

Usage of procurement data @ Tender Experts

- TED provides enormous dataset
- We provide our clients with specific subset:

for each Tender Lot

- Who published
- What is it about
- Who participated
- Who won

• ...

In form of an alert service and tools to use (statistical) data

Tender Leads

- Deliver new tender publications and updates on a timeline
- Range of tools to facilitate Go / No Go Decision

TIE

www.tenderexperts.be

Tender Intelligence

- Insights by agglomerating data:
 - What are the trends?

•

- What are the regional differences?
- Which contracts will be renewed when?
- What companies are participating?
- What companies are winning?

Why no Opening information availability?

- What is Opening information?
 - Publication of all companies participating in a tender
 - Available in Belgium:
 - Legally it is an "option" for public body to publish
 - 30-50% published in practice
- No Opening information on TED! Why not ?
- What type of analysis does Opening information allow?
- What are beneficial effects of this additional transparency?

Example: Who dominates insurance market in Belgium?

- Who participates where?
- Are there any evolutions?
- What is the presence
 - per region?
 - type of sector?
 - type of administration?

ightarrow Insights not possible today on TED

PUBLIC PROCUREMENT DATA SUPERPOWERS

Effect of Opening information on transparency:

- Opening information allows companies to get insights about:
 - Which markets are very competitive
 - Which markets are currently a mono/duopoly
 - Allows a new competitor to identify the least competitive markets
 - Allows to see and act on the performance (& evolution) per region, type of sector, administration type & region, ...
- Using these insights companies will:
 - Better position themselves
 - Choose better where to participate
 - Find tenders with less competition and/or more suitable for them

Efficient tendering:

- Make Opening information available
- Allows companies to focus on which tenders to participate & markets to explore
- Leads to more competitive bids
- Creates more efficient tendering

So why not make publication of Opening information mandatory throughout EU?

Thank you!
