

Universal Business Language (UBL)

Streamlining Public Procurement with OASIS UBL

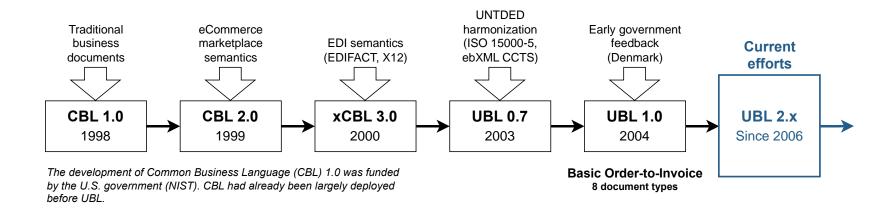

Kenneth Bengtsson

Chair, OASIS UBL Technical Committee

Introduction to OASIS UBL (ISO/IEC 19845)

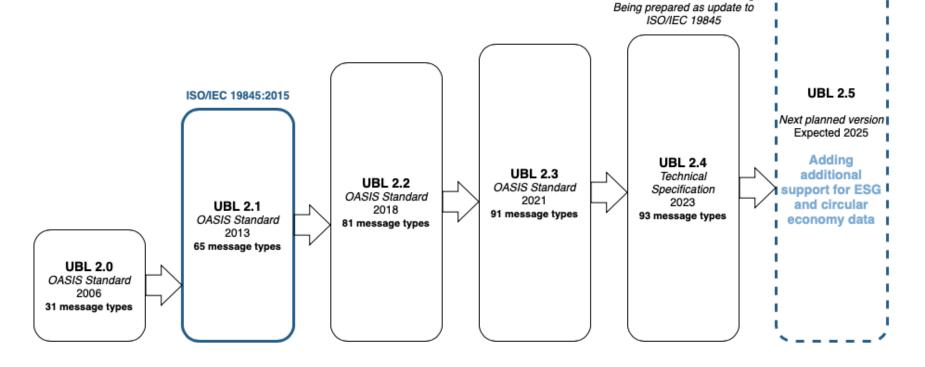

- Royalty-free library of 93 electronic business document standards
 - Supports business processes for tendering and contracting, sourcing, planning and forecasting, transportation and logistics, fulfilment and shipping, ordering, invoicing, billing and many others

• Developed over 25 years in an international, open and collaborative environment

Evolution of UBL

Backward Compatibility: All minor version updates remain compatible with UBL 2.0 and later versions

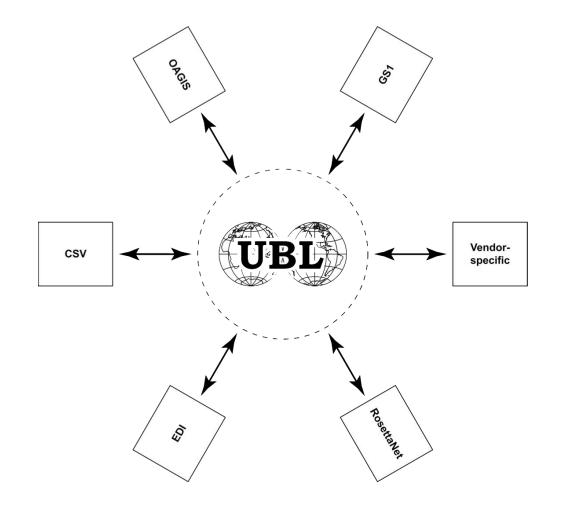

CURRENT EFFORTS

In its final standardization stage

The concept of a "hub" format

- UBL semantics map to all common business data formats
- This means that users need support only one kind of conversion: to and from UBL

UBL 2.4 supports 93 document types

Circular Economy: Reusable Data & Efficiency

- Enhancing UBL for sustainability:
 - Adapting to ESG and circular economy for sustainability and compliance readiness.
- Unified ESG Integration:
 - UBL's reusable data components streamlines implementation of ESG and circular elements in existing procurement and supply chain systems.

Thank you for your attention & stay connected!
