(1) Year — registration number — Member State of origin.

(2) Deadline for comments from Commission and Member States.

(3) The usual information procedure does not apply to 'Pharmacopoeia'.

(4) No standstill period as the Commission has accepted the grounds for urgent adoption.

The Commission would point out that, under the terms of its communication of 1 October 1986 (OJ No C 245, 1. 10. 1986, p. 4), it considers that if a Member State adopts a technical regulation which comes under the provisions of Directive 83/189/EEC without communicating the draft to the Commission or respecting the standstill obligation, that regulation cannot be enforced against third parties under the terms of the legal system of the Member State in question. The Commission therefore considers that litigants have a right to expect national courts to refuse to implement national technical regulations that have not been notified as required by Community law.

Information on these notifications can be obtained from the national administrations, a list of which was published in *Official Journal of the European Communities* No C 67 of 17 March 1989.
